

Firebox® T10, T30 and T50

PROTECT WHERE YOU CONNECT

RETHINK THE PERIMETER

Ideal for small office/branch office and small retail environments, the Firebox T10, T30 and T50 create a secure network perimeter in remote locations that do not have adequate security protection in place today. Comprehensive Unified Threat Management (UTM) safeguards intellectual property and protects personal data, credit card numbers, and other critical assets from exposure and theft.

THE BENEFITS OF UTM

An all-in-one network security solution integrates complete protection. All security capabilities work together for a comprehensive approach to network protection with a single console for reporting.

- Application-layer content inspection recognizes and blocks threats that stateful packet firewalls cannot detect.
- Powerful subscription-based security services boost protection in critical attack areas for multiple layers of defense. By partnering with leading technology providers, WatchGuard is able to integrate best-of-breed security components into one Unified Threat Management platform for stronger security at big cost savings.
 - **APT Blocker** uses a cloud-based sandbox with full system emulation to detect and block advanced malware and zero day attacks.
 - **Application Control** keeps unproductive, inappropriate, and dangerous applications off-limits.
 - **Intrusion Prevention Service (IPS)** delivers in-line protection from malicious exploits, including buffer overflows, SQL injections, and cross-site scripting attacks.
 - **WebBlocker** controls access to sites that host objectionable material or pose network security risks.
 - **Gateway AntiVirus (GAV)** scans traffic on all major protocols to stop threats.
 - **spamBlocker** delivers continuous protection from unwanted and dangerous email.
 - **Reputation Enabled Defense** ensures faster, safer web surfing with cloud-based look-up.
 - **Data Loss Prevention (DLP)** automatically inspects data in motion for corporate policy violations.
- Multiple VPN choices (IPSec, SSL, L2TP) for secure remote access include support for Android and Apple iOS devices.

EASY TO MANAGE

- Interactive, real-time monitoring & reporting, at no additional charge, give an unprecedented view into network security activity so you can take immediate preventive or corrective actions.
- **WatchGuard Dimension™**, a public and private cloud-ready visibility solution, instantly turns raw data into security intelligence.
- **RapidDeploy** technology enables quick, secure configuration at remote locations without technical staff on-site.
- Intuitive management console centrally manages all security functions.
- Drag-and-drop Branch Office VPN setup – three clicks and your remote office is connected.

CHOOSE BUILT-IN WIRELESS

- Wireless models (those with -W at the end of their model number) include optional dual-band 802.11a/b/g/n/ac technology for much more responsive wireless network connection and expanded range. 2.4 GHz or less crowded 5 GHz band.
